

FROM THE PITCH TO THE CATHLAB / OPERATING ROOM

Sports Medicine Conference – July 9, Sosnowiec, Poland

As part of the European Football Medical Championship, the Polish Medical Team Foundation is proud to co-organize a unique medical conference bringing together experts from sports medicine, cardiology, and interventional disciplines.

This one-day event will explore the critical interface between athletic performance and advanced medical care — from pitch-side decision-making to cutting-edge interventions in the cathlab and operating room. The program will feature dynamic, case-based sessions focused on topics such as sudden cardiac death in athletes, modern electrotherapy, and trauma management in sports.

Designed for clinicians, researchers, and healthcare professionals with an interest in sports and cardiovascular medicine, the conference offers a practical, multidisciplinary perspective in an engaging and accessible format.

Participation is free of charge.

Join us in Sosnowiec for a focused, high-value scientific exchange at the crossroads of sport and medicine.
